# INTRODUCTION

---

Kredict is a decentralized launchpad that allows users to launch their token and create their initial token sale with staking benefits to their holders and they don't require any Coding Knowledge For this. Our Unique and safest token SWAP DEX is under development and will create a benchmark in the Dex segment. A Crypto Wallet and Own Blockchain network with zero transaction fees is under development Pipeline. So Be Part of this Revolution as everything Revolves Around Our Native Token **KREDICT**

# SERVICES

---

KREDICT provides the following services

- Token Launchpad
- Token Development
- Token Presale
- Contract Audit
- Owner KYC
- Swap
- Staking
- Crypto Website Development
- Token MultiSender
- and the list goes on...

# ROADMAP

---

## PHASE 1

- Team Development
- Website Launch
- Smart Contracts Testing
- Token Creation

## PHASE 2

- Third Party Audit
- Launchpad Started
- Staking Contract Live
- Marketing Module Added

## PHASE 3

- Promotion Started
- 150 k + Community
- SWAP Launch
- Token CEX Listings

# ROADMAP

---

## PHASE 4

- Wallet Development
- Own Blockchain Network
- Exchange Partnership
- Token Burning

# FUTURE PRODUCTS

---

## ONE

### Decentralized Exchange

Decentralized Exchanges (DEXs) are peer-to-peer marketplaces that allow users to trade and exchange cryptocurrencies without interference from centralized authorities. And we are as KREDICT going to develop one very soon, which saves users from extra exchange charges.

and features like

- Anti-rug Pulled Coded
- Don't need Liquidity
- Anti-whale Coded
- Don't charge any fees
- Safe and Fast
- Don't need Slippage
- Take Care of both Seller & Buyer

# FUTURE PRODUCTS

---

TWO

## Crypto Wallet

A cryptocurrency wallet is a device, physical medium, program, or service which stores the public and/or private keys for cryptocurrency transactions. In addition to this basic function of storing the keys, a cryptocurrency wallet more often also offers the functionality of encrypting and/or signing information. And we are as KREDICT going to develop our own Crypto Wallet that users can use as a Mobile Application of Web Browser Extension to get Connected and use with Web3

# FUTURE PRODUCTS

---

## THREE

### Blockchain

A blockchain is a type of distributed ledger technology (DLT) that consists of a growing list of records, called blocks, that are securely linked together using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a Merkle tree, where data nodes are represented by leaves). The timestamp proves that the transaction data existed when the block was created. And we as KREDICT are going to develop our Blockchain very soon which has

- Lower Gas Fee
- Fast Transaction
- Simple and Transparent Architecture

# TOKENOMICS

---

Token Name

**KREDICT**

Token Symbol

**KDT**

Total Supply

**10,000,000,000**

Decimals
